

SHOCK alert[®]

DETECTS ELECTRICAL VOLTAGE IN WATER

#42500

WHAT IS ELECTRIC SHOCK DROWNING (ESD)?

Water can become electrified at any time. Pools and docks are surrounded by lights, pumps, boat lifts, etc. Faulty wiring, failed GFCI's, or stray voltage can introduce electricity to the water where your family swims. When this low level AC current passes through the body with enough force to cause paralysis, **THIS CAN RESULT IN DROWNING – ELECTRIC SHOCK DROWNING**

PREVENT ELECTRIC SHOCK DROWNING BY TESTING THE WATER WITH SHOCK ALERT

HOW DOES SHOCK ALERT WORK?

Shock Alert is a device that uses three (3) probes to detect voltage gradients in water and warn you and your family of potentially dangerous electricity.

FLASHING WARNING INDICATORS

If there is voltage present in the water, the Shock Alert will flash red LED warning lights.

AUDIBLE WARNING INDICATORS

The Shock Alert is equipped with audible warning indicators that beep loudly when electricity is detected in the water.

INCREASING WARNING INDICATORS

As you move closer to the voltage source, the intensity of visible and audible warnings will increase.

WHERE SHOULD SHOCK ALERT BE USED?

POOLS

DOCKS

FOUNTAINS
